

# Predictions for 2013

*Joni Patry*

The patterns of continuous planetary cycles relative to earth and an understanding of human behavior is astrology. Everything happens for growth and betterment of humanity.

I back my predictions with evidence of past historical events containing similar planetary aspects. History does repeat itself through cycles, and there is a certain level of consciousness that has evolved.

***The 2013 predictions will affect everyone.***

***This year can bring personal inspiration with windfalls of luck and financial prosperity. Keep in mind even though it looks like a year of gloom and doom, it is a year of transformational change. And if you like drama and excitement this is your year!***

Please consider the future possibilities without fear. I must caution you before reading my predictions that this is a very challenging year ahead.

## **Some Points to Consider:**

- 1) It is the end of the cycle. The Mayan calendar ends a week before 2013.
- 2) Discoveries in Space and Time change perception
- 3) Change of this magnitude produce windfalls and a sudden rise in fortune or misfortune.
- 4) Saturn is extraordinary in power and strength. It produces karmic rewards. Your past due efforts will manifest.

The Mayans, a Mesoamerican civilization were the most sophisticated keepers of time, using mathematical and astronomical planetary alignments to specify timing and cycles. According to their calculations the Mayan calendar ends on

the date of December 21<sup>st</sup>, 2012. Some assume this means the world ends, but most agree it indicates a time of dramatic change.

Many aspects of being human will never change. We will always feel and need each other. Healing comes through unity and healing the emotions.

As the seasons represent the cyclic changes we are headed into the end of times before a rebirth. We have to remember it is what we take away from these experiences that gives our life meaning and purpose. Challenging times develop our heart and soul.

People will always be opposed and fight, but to come to an agreement or resolve differences takes evolvment in consciousness to surrender of the ego. This frees us from the world of hostility, chaos, and opposites, and can release the chains of karma or cause and effect.

It is a year of challenge and change, war and peace, conflict and surrender. How will this all play out? Nothing is cast in stone, for the future results from trends being created now. This involves our free will. ***The astrological cycles are like a weather forecast, so with this in mind prepare for a storm.***

### **Most Outstanding Aspects for 2013**

- 1) Pluto square Uranus
- 2) Saturn conjunct Rahu
- 3) Saturn aspect Pluto
- 4) Saturn quincunx Jupiter/Saturn trine Jupiter
- 5) Jupiter square Uranus
- 6) Sun/Mars/Ketu oppose Saturn/Rahu

Uranus squaring Pluto encompasses the big picture occurring within the year. The more immediate aspects involve Saturn's aspect to Rahu and Jupiter. These are the defining features of the year. Specifically, the eclipses bring in certain intensity, and planets that conjunct the eclipse degrees always flavor the year. Saturn is a dominant feature throughout 2013. To activate events, the transit of Mars and the Sun instigate the timing. When they aspect Saturn and Rahu, big events will occur.

## **Uranus and Pluto**

The aspect that rules the foremost issue that is unfolding is the cycle of Uranus square Pluto. These are the two outer planets that involve the masses and the collective unconscious.

Uranus and Pluto will make an exact square in their retrograde and direct cycle seven times within the next few years.

Pluto rules the powers that control the world, the financial markets and monopolies. In the past and even today, this power is seen in dictatorships and even mafias. Power gives an enormous sense of ego and those with this power begin to abuse their power. As the masses adore those in power the ego becomes stronger and the taste of power becomes an addiction, as in rulers, dictators, public figures, famous actors, rock stars, and athletes. Religious leaders can delude themselves with power. The sense of greatness can destroy their followers and themselves while the meaning and purpose of their teachings are lost in the pursuit of the ego.

The message of Pluto is to release the need to be in control. Pluto is related to the sign Scorpio, our passionate drive. It rules our deep emotions connected to our ego. When we don't feel powerful it is because we have lost our connection to the Divine. We seek power through worldly attachments such as money, sex and drugs. These are a few ways we can temporarily feel powerful. These vices have a strong emotional pull.

When we are driven by our emotions we feel controlled. The signs these planets are transiting will bring forth certain areas these signs rule and represent.

Pluto in sidereal astrology is in Sagittarius so this reflects the power of our spiritual and religious needs. There is a breakdown and exposure of the truth behind the churches and religions. No more blind faith, and people are questioning their beliefs.

The aspect of Uranus square Pluto means a breakdown of old controlling forces of our world. Uranus is the planet that rules sudden unexpected change. This rules electricity, so the intensity this planet delivers comes like a jolt. This planet is known to be eccentric, unconventional, revolutionary and rebellious. This powerful force for radical sudden change strikes at the forces of power that have controlled the world.

In the next few years the overriding forces that have controlled the world are suddenly being forced to change. As the masses rebel through destructive force they break down the prison walls to freedom. This is reflected through retaliation of dictators throughout the world. Freedom comes with a price and the result usually costs lives.

Control and power of the churches are brought to justice, as the priests and corruption of the churches are held accountable. Change is necessary and needed for growth, and Uranus square Pluto indicate a break down of powers that control the world and the growth process of surrender.

Uranus and Pluto form a hard aspect about every 35 years. After the conjunction, there will be a waxing square and opposition, then a waning square, then back to a conjunction taking about 127 years (depending on Pluto's elliptical orbit). The signs play a part in the planetary picture of the time. This flavors different generations born during these times. They were opposed at the turn of the century in 1900: Pluto was in Taurus, and Uranus in Scorpio. They formed a waning square in the 1930s, Uranus was in Pisces, and Pluto was in Gemini. Then they formed a conjunction in the 1960s in Leo bringing us to the waxing square of 2011-2014 with Uranus in Pisces, and Pluto in Sagittarius.

There is a huge turning point in history each time there is a hard aspect (conjunction, opposition or square) with these two planets of transformation and change. The last time Uranus and Pluto formed a square was in 1931-1934, indicating another economic crisis.

### **Saturn and Jupiter**

Jupiter and Saturn's cycle determine the economy and the social climate of the world. It takes 20 years to circle through the zodiac and form a conjunction, and 10 years following their conjunction they form an opposition. This can be viewed like the lunation cycle of the waxing and waning moon. All cycles have a first quarter, full, last quarter and new moon cycle. A conjunction is like a new moon, waxing quarter is a square, and the opposition is a full moon, and then waning quarter is a square as it circles back to the starting position of a conjunction (new moon).

Jupiter and Saturn were in opposition last year indicating the need for balance. This concerns politics and finances. The aspect that is in full force currently is the waning quincunx, which is the most difficult aspect for the economy. A serious correction must be put forth to balance the global economy and leadership. Balance comes through the cycles, the power of cause and effect or forces of nature.

Jupiter and Saturn will be in quincunx until this summer 2013, when they will form a trine, which gives way to ease and flow. This means the first six months of the year will involve many new ways to balance the economy and the government. The economy needs radical adjustments that will cause major loss and may shut down many businesses. June brings hope when Jupiter changes signs after a very hard and devastating wake up to reality. But we are only half way through this 20 year cycle and the total results are to be realized when Jupiter and Saturn conjoin again in seven years, in 2020.

### **Saturn Aspect Pluto**

Saturn fully aspects three signs forward in the zodiac. This means that while Saturn is in Libra it is aspecting the sign Sagittarius with full force. Therefore, any planets in Sagittarius are being fully aspected by Saturn. Pluto is aspected by Saturn this entire year. So with Pluto being aspected by Uranus the break down of sudden change is also being brutally hit by Saturn. Saturn rules

endings, and death, so the powers controlled by Pluto are being terminated. There will be many endings that give way to radical changes this year.

Pluto and Saturn in aspect bring disasters. They are in hard (conjunction, square and opposition) aspect about every nine years. The last square was in 2010 and this year had many natural disasters – an earthquake in Haiti that was the deadliest on record and another massive earthquake in Chile, volcanic eruptions in Iceland, and man-made destruction with the oil spill in the Gulf of Mexico. Saturn and Pluto were in opposition nine years prior in 2001 when the 9/11 terrorist attacks occurred. The square nine years before, 1992-1993, was the first world trade center bombing.

*The rate of speed of each planet determines when they will form major aspects to each other.*

### **Conjunctions**

Jupiter/Saturn: 20 years

Jupiter/Uranus: 14 years

Jupiter/Neptune: 13 years

Jupiter/Pluto: 13 years

Saturn/Uranus: 45 years

Saturn/Neptune: 36 years

Saturn/Pluto: 33 years

Uranus/Neptune: 171 years

Uranus/Pluto: 127 years (average)

Neptune/Pluto: 492 years

The vast scheme of the social, economic and mass emotional climate in the world involves the cycles of Saturn and Jupiter with Rahu and Ketu.

Excerpt from *“How to Make Money Using Astrology”*.

*“There are cycles within cycles that determine the trends of each year. The most important cycle that concerns all of life’s experiences is the nodal axis of the moon, called Rahu and Ketu. The axis of fate and destiny for Rahu brings us into life and deals with all things in the material world, and Ketu pertains to the spiritual world and determines our spiritual development and exit from this world.*

*Within the nodal axis the other planets that determine the emotional trends globally are the social planets Jupiter and Saturn. These cycles of Rahu/Ketu and Jupiter/Saturn will work together to determine the cyclic patterns of events on planet Earth. Both Rahu and Ketu are diametrically opposite in meanings and results, and Saturn and Jupiter are opposites as well in meaning. Rahu is the material world and Ketu is the spiritual world, and Jupiter is growth and expansion while Saturn is contraction and limitation.*

*It is to understand these simple meanings and that these opposite energies give reason to the highs and lows of our world. Looking backwards will give the understanding of these cycles and how they work, so we can apply these results to the future. With this information we can plan for the cyclic trends, whether the trends will be up or down. These cycles are the same as the ebb and flow of the tides. There is a time when to move forward and a time to pull back.*

*With this understanding, Rahu is much like Jupiter, it expands and increases things and Ketu is like Saturn for it is about withdrawal, loss and contraction.*

*Jupiter and Saturn conjunct each other every 20 years, and 10 years after the conjunction of Jupiter and Saturn these two planets will form an opposition to each other. So we will look at 10-year increments, the conjunction, then the opposition 10 years later, then 10 years later from this last date they return to a conjunction. This 20-year cycle of Jupiter and Saturn is of major importance and is referenced in different cultures. It is speculated that the 20-year increments of the Katoons of Mayan astrology are related to the 20-year cycle of Jupiter and Saturn.*

*Along with the 20-year cycle of Saturn and Jupiter there is the cycle of Rahu and Ketu, which is a revolving axis of two points that travel backwards in the zodiac. These two points are always exactly opposite. These points travel through the entire zodiac of 12 signs in 18½ years. So they reach their half-way point in about nine years. They remain in a sign for 1½ years, or 18 months. The half-*

*way point of Rahu and Ketu is almost the same as the half cycle of Jupiter and Saturn when they form an opposition.*

*The big picture will be revealed with these 20-year and 10-year segments, but to really observe the smaller trends for the stock market involves the breakdown of these cycles, which are:*

- 9 years is the half cycle of Rahu/Ketu*
- 3-4 years Jupiter will conjoin one of the Nodes (Rahu or Ketu)*
- 6 years Saturn will conjunct one of the nodes (Rahu or Ketu)*

*At these intersections there will be a rise or fall.*

*Primarily, Saturn with Rahu gives a rise in the economy and Saturn with Ketu will cause a decline. Jupiter with Rahu can go either way, and Jupiter with Ketu can go either way as well. What will determine the true rise is in the signs that Saturn and Jupiter occupy. When Jupiter is in its sign of exaltation (Cancer) it will give a quick, strong rise, especially with the nodes, and Saturn in its sign of rulership or exaltation (Capricorn, Aquarius, and Libra) there will be building and productivity. Mark the times when Jupiter is in Cancer and Saturn is in Capricorn, there was always a rise in the economy. Generally, with a rise there is usually an over extension and things become imbalanced, and the economy has to retreat after these high times.*

*These points are to be tracked in the economic cycles globally, the 20-year cycle of Jupiter's and Saturn's conjunction, and the half-way point between this 20 years where they oppose each 10 years after the conjunction. Then about a year and a half following the conjunction or opposition of Jupiter and Saturn, both Jupiter and Saturn will cross over the nodal axis."*

- 1) Jupiter conjunct Saturn 20 years*
- 2) Jupiter opposed Saturn 10 years after the conjunction*
- 3) Within the conjunction and opposition of Jupiter and Saturn their crossing over the nodes of the moon (Rahu and Ketu) create the shifts.*

*It is cycles within cycles of Rahu/Ketu and Jupiter/Saturn that produce the many changing tides within the framework of our society and lives. It is not only just the patterns and cycles these planets form, but it is also important to understand what signs these planets occupy, for the signs can make the energy positive or negative. This is another layer to this complex web of life.*

But there is a synergy and pattern that can be recognized and used for the understanding and betterment of our lives.

### **Rahu Conjunct Saturn**

The most significant aspect occurring in 2013 involves Saturn and Rahu in Libra. This dominates everything about this year.

Saturn takes 30 years to cycle through the zodiac and Rahu takes 18½ (Rahu travels backwards in the zodiac). They conjunct every 11 years, but the signs they converge in are crucial in their effects.

My search was to find the last time in history they conjoined in the sign Libra. I began to investigate the details surrounding the cycle of Saturn and Rahu throughout history and significant historical events. Here are some interesting facts surrounding this astrological aspect. With the facts presented I will let you be the judge of the possible outcome of the planetary events in our future.

Each time Saturn and Rahu form a conjunction every eleven years there is warfare, revolutions, rebellions, end of monopolies or dictatorships, civil rights and prejudices, natural disasters, and nuclear energy involving attacks.

### **Rahu and Ketu**

Rahu and Ketu, are the points where the Sun and Moon cross paths, thus determine where the eclipses occur for that year. The signs in which they occur indicate the most powerful change. Rahu magnifies the planets it is conjunct. These planets and what they represent become critical for that year.

Rahu rules, fanaticism, obsessive and compulsive behavior, extremes, fear, addictions, drugs, alcohol, fame, power, worldly success, outer turmoil, gives sudden and unexpected results and windfalls. Rahu rules our desires in the material illusionary world.

In mundane astrology Rahu rules technology, computers, nuclear energy Collective trends, epidemics, disease, poisons, foreign lands and foreigners, aliens, dark skin, medicine and air travel. Associated with the 4<sup>th</sup> house, this indicates riots in the land.

- Rahu is said to reflect the qualities of Saturn, and Ketu the qualities of Mars. When Saturn and Rahu come together they accentuate their qualities further indicating severe times with this conjunction.

## **Saturn**

Saturn is the planet of the material physical world, for it rules structure and the constraints of time, structure, discipline, responsibility, organization, old age, wisdom, maturity, delays, setbacks and death, seriousness, physical reality, perseverance, diligence, most valuable lessons, hard work, and experience. The ravages of time cannot be overcome or avoided, but without the influence of Saturn our world would be in chaos.

In mundane astrology Saturn rules land, animals, cattle, minerals, oil, coal, mines, civil servants, government, natural resources, agriculture, farming, and the working class, depressed and oppressed people, dark skin, aging, endings and death.

## **Libra**

The sign Libra concerns balance, peace, relationships, fairness, government and justice. Saturn is exalted in Libra. So all the areas ruled by Saturn will manifest profoundly in our lives this year.

### **Saturn conjunct Rahu in Libra**

When analyzing cycles it is important to review previous cycles to conclude their effects. There is never a time where all the coordinates are exactly the same, but there are unique similarities.

Here are the principles to be considered when assessing the forthcoming conjunction of Saturn and Rahu.

The sign this conjunction occurs in is extremely important. Vedic astrology gives power to the planets in terms of the strengths and weakness in the signs. The energies of the planets become more powerful in the signs of exaltation and weak in the debilitated signs. Furthermore, Rahu exaggerates this energy for good or bad depending on their signs of strength or weakness.

**Saturn is exalted in Libra and debilitated in Aries**  
**Rahu is exalted in Taurus and debilitated in Scorpio**

As Rahu and Ketu change signs they will begin their influence immediately. Events take place within the month they emerge into a new sign. January will begin with an onset of events that will continue to have an effect during the time that Saturn and Rahu are together in the same sign.

Saturn's transit in the same sign can vary in duration, because of the retrograde process. They will be together in Libra January 14, 2013-July 13, 2014. This is the entire time that Rahu stays in one sign (18 months). Saturn will stay in Libra till November 2, 2014.

### **2013 Saturn and Rahu in Libra/Specific Dates**

**Saturn in Libra: November 16, 2011-November 2, 2014**

**Rahu in Libra: January 14, 2013-July 13 2014**

### **Saturn Retrograde**

**Saturn retrograde: February 18, 2013-July 8, 2013**

Saturn turns **Retrograde: 17 Libra**, becomes **Direct: 10 degrees Libra**.

Becomes weak like debilitated while retrograde.

### **Nakshatra: Swati**

**Saturn in Swati: October 12, 2012-November 4, 2013**

**Rahu is in Swati: July 16, 2013-February 14, 2014**

**\*Saturn conjunct Rahu: exact September 17, 2013**

### **Degree of Solar Eclipse and Station**

- **17 degrees of Libra** is a very specific and important degree that **Saturn stations** and is the **degree of the solar eclipse November 3, 2013**. Those with a birthday on November 3<sup>rd</sup> will have an extraordinary year of change. The house your Sun occupies determines if this is a year of great loss or gains. Also, if your birthday falls around May 9<sup>th</sup> the solar eclipse will occur on your Sun 25 degrees Aries indicating a year of sudden disruption and change. There are aspects of your life you must release or change. This will be an intense year for both Libra and Aries.

## **Nakshatras Saturn and Rahu Transit**

The nakshatras are smaller portions of the zodiac (13 degrees 20 minutes) that have specific meanings like the signs. They are ruled by a planet and have a symbol and a deity (god). The myths and deities are similar to the gods in Greek mythology. There are 27 nakshatras.

### **Vishakha: (20 degrees Libra – 3 degrees 20 minutes Scorpio) Ruled by Jupiter**

#### **September 28, 2012-July 16, 2013: Rahu in Vishakha**

The symbol is a triumphal gateway decorated with leaves, indicates success through power. The ruling deity is Indragani, a pair of deities, one is the chief of the gods and the other is fire deified. Vishakha is fixated with defeating any rivals, and is likened to dictators and conquerors. There is no room for compromise with Rahu in this nakshatra.

### **Swati (6 degrees 40 minutes Libra– 20 degrees Libra) Ruled by Rahu**

#### **July 16, 2013- February 14, 2014: Rahu in Swati**

#### **October 12, 2012-November 4, 2013: Saturn in Swati**

#### **July 16-November 4, 2013: Both Saturn and Rahu in Swati**

The symbol is a young sprout swaying in the wind, indicates independence and movement. The ruling deity is Vayu, the wind. This represents new growth and beginnings, but the tendency to sway back and forth. The symbol of the wind indicates strong forces, which represent storms and severe weather conditions such as hurricanes, typhoons, and tornadoes throughout this time.

### **Putting it All Together: Future Predictions 2013**

Saturn conjunct Rahu will bring great fear, fanaticism, breaking free of oppression, break down of old regimes, natural disasters, nuclear destruction due to rise of power in foreign lands, oil price escalation, new wars and economic crises. But there will be new discoveries in medicine and disease prevention. Technology will expand and there will be a breakdown of old

monopolies that controlled the markets. Air travel becomes more advanced with discoveries in outer space. Terrorism is on the increase with many events.

The sudden rise of oil prices will initially be due to conflict in the Middle East. This will make America more determined to be oil independent, expanding drilling and exploration in the states. But as there was an anti-trust decision passed in 1911 with Standard Oil, there will again be some major decisions concerning the oil companies that control the world. The 1911 ruling broke up a major monopoly. The conjunction during 1911 was in Aries, which is in opposition to the current 2013 conjunction in Libra. Taxes and new laws implemented by the government will disable the oil companies, causing oil prices to rise, further hindering the economy.

As the Civil War and World War II ended during a Saturn/Rahu conjunction, so will many civil wars taking place around the world. Extreme intensity of warfare heightens, then dissolves into surrender and endings. Much of the social upheavals concern power and money.

There were social uprisings that involved racial issues concerning prejudice and assassinations with President Lincoln, Martin Luther King Jr. and Robert Kennedy during the past Saturn/Rahu conjunctions. Therefore, this may be a theme globally for this year.

Therefore, my conclusions and predictions for this year involve conflict, social upheavals, protests, racial revolutions, the rise and fall of world powers, anger, threat of nuclear war, and issues revolving around energy and fuel. Conflict will give rise to compromise and resolution.

### **Mars and Sun Oppose Saturn and Rahu**

**April 14-May 15, 2013: Sun in Aries (Exaltation)**

**April 13-May 24, 2013: Mars in Aries (Rulership)**

**April 30-May 01, 2013: Mars oppose Saturn**

**\*\*Very intense period when Mars and Sun are in Aries. Violence and anger will dominate during this stressful period. Violent attacks will occur worldwide.**

Mars rules blood, weapons and war. During this time issues concerning Mars surface throughout the world.

**March 15-June 15, 2013:** Mars and Sun will travel neck-in-neck together in the same signs.

**\*January-April 2011:** Previously Mars and Sun transited together, produced riots and destruction in Egypt and the assassination of Osama Bin Laden.

**March 2013:** A concentration of planetary energy with Neptune causes deception. There are undercurrents that will cause major problems in the next few months.

**April 2013:** Apprehension and uncertainty with regard to a stellium of planets in Pisces begins to surface. A stellium is three or more planets in a sign. At the time of the new moon there will be six planets in Pisces - Mercury, Uranus, Moon, Sun, Mars, and Venus. This concentration of energy is 6/8 Shashtaka or quincunx to Saturn and Rahu, a very incongruent aspect. While Jupiter and Saturn have been in a 6/8 relationship this year, they are forming a yod with Pluto. A yod involves three planets, one planet (apex planet) forms two quincunx aspects (150 degrees) to two other planets. These two planets form a sextile (60 degrees) to each other. Jupiter is the apex planet casting two quincunxs to both Saturn/Rahu and Pluto. This is a crucial aspect that indicates a collapse of government concerning the economic crises. There is another complex yod involving the stellium in Pisces, which forms multiple yods with Jupiter and Saturn/Rahu. This represents a crisis and a culmination of many events causing confusion and dysfunction. It appears the bottom is about to drop out.

Anger is building with an incongruent mix of emotions concerning the financial climate and world affairs. The yod is referred to as the "Finger of God". Fated events are in effect and the laws of nature bring balance to the discordant world. These events will teach the necessary lessons of unity, support, and compromise in order to heal this dilemma. This aspect is a precursor to the oppositional energy that will transpire when the Sun and Mars enter Aries. This indicates there will be a breaking point towards the end of April.

The Sun transits through the zodiac once a year while, Mars takes two years. They will conjoin and travel together about once every two years. The last time they were together was January-April 2011. The sign the conjunction occurs in is very significant.

**April 16-17, 2013:** Mars will conjunct Sun 1 degree Aries, in opposition to Saturn and Rahu. Furthermore, Ketu is conjunct Mars and Sun. This means the eclipses will be occurring with Mars and Saturn. The solar eclipse occurs May 9, at 25 degrees of Aries. Mars marks a critical and violent time period, as it will cross the eclipse degree on May 17 causing a violent social uprising. It is noted that when a planet crosses over a previous eclipse degree it activates an event associated with the planet transiting this degree. On September 11, 2001 Mars transited exactly on that day the previous eclipse degree.

Violence will prevail March-May 2013, but a healing will transpire during the summer.

The solar eclipse in May is with Ketu, and the solar eclipse in November is with Rahu. On a personal level the effects of the eclipses will affect everyone differently. The houses of an individual's chart that these eclipses occur determine the areas of life affected. Sudden rise in fortune or misfortune can be predicted from these eclipses.

### **Eclipses 2013**

**Solar eclipse May 09, 2013: (25 degrees Aries)**

**Solar eclipse November 03, 2013: (17 degrees Libra)**

May solar eclipse occurs with **Ketu**: Mars conjunct eclipse

November solar eclipse occurs with **Rahu**: Saturn conjunct eclipse

Ketu represents loss and Rahu gains, therefore the eclipse in May will be more violent and destructive with Mars conjunct Ketu, but both eclipses will be powerfully strong and produce enormous change. Rahu is said to be like Saturn and Ketu is like Mars. It is uncanny that they are both conjunct the planet they are most likened with at the time of the eclipse. This intensifies the power of Mars and Saturn during this time.

## Overview of Events 2013

Events during both of these eclipses will change the world's conditions. The eruption of violence around May will have to be resolved in November 2013. Outbreaks of violence and war may be put to rest by November but only with violent retaliation. This may be reminiscent of the years that wars were concluded by severe events such as in 1945 (atomic bomb dropped) and 1865 (Lincoln assassinated) where wars ended after extreme events.

Jupiter in Gemini will exaggerate the events occurring as it trines Saturn/Rahu and conjoins Venus and Mercury in June 2013.

The U.S. Presidential office will be in a very difficult place that evokes mass emotions, but the realization that this brings to America and the world is our self-imposed destruction, and the importance of learning to work together.

What do I believe will happen? It will be an event that forces people to surrender and work together! Tragedy puts things in perspective, and brings people together with a sense of humanity realizing that healing of the human spirit is our purpose and the heart transcends any disagreements. ***This is the truth of Saturn and Rahu in Libra because they involve relations, politics, and leadership, because Libra is the sign of peace, and rules relationships and love.***

During the summer months Jupiter enters Gemini conjuncts Venus and Mercury forming Saraswati yoga (goddess of learning, arts, and music) and casts a trine to Saturn and Rahu. This will bring a turn in the economy. By July 8, Saturn will turn direct taking on its full force and power in the sign of Libra. Balance and healing are coming out of chaos and destruction. It may not appear peaceful but it is an important break in the outcome of worldwide deterioration.

Amazing things will occur this year that will change the world. It will come from great difficulty but will transform the future and ultimately bring balance to the chaos. This affects our moral, political, economic and spiritual senses.

Looking back 12 years ago when Jupiter was in Gemini, the terrorist attack of September 11, 2001 occurred. This event united many, as tragedies bring people together. If humanity does not learn to work together there will be an event that awakens people to realize the importance of unity no matter what our differences.

In July there is a stellium of planets in Gemini, Mars, Jupiter, Moon, Sun, and Mercury. This will have a powerful potent punch. I would like to believe this is a time for growth and change. Jupiter and Rahu both cast trines and the fact that they are in mutual trine during this time indicates they are in full aspect empowering the effects of their placements even more. A very important feature is that the natal chart for the U.S. has four planets in Gemini in the 7<sup>th</sup> house (Mars, Venus, Jupiter and Sun). These planets are about to be aspected by Rahu, Jupiter, and Mars. The opposition from Pluto means that there is a transformation occurring out of these events. The world is evolving and growing, and the effects are ultimately for our highest good. The way in which the economy, government, and media operate will change due to the intensity of events occurring this year.

In the mist of such change and transition we are in the eye of the hurricane and cannot see the effects that will transpire out of the chaos. But the effects will create the changes needed. Our resistance to the changes is what creates the tension and backlash.

With the emphases on air signs we have severe weather due to winds but figuratively it is the winds of change. Saturn in Libra is about balancing power and government.

Towards the fall season, Rahu and Saturn are in nakshatra Swati indicating severe weather, storms and winds. Hurricanes, typhoons and tornados with earth changes involving earthquakes, tsunamis and volcanic eruptions will be more active during July and August.

Jupiter in Gemini is squaring Uranus. Mars and Jupiter are in Gemini forming a T-square between Pluto and Uranus. This is another powerful aspect defining this year. This will be a turning point globally through the harsh winds of change. This is a shift that will come as a breakthrough in compromise and balance.

The fundamental rules and laws will change. Truth and nature will balance the injustices. Results speak the truth. We can no longer convince ourselves of the delusions that have kept us in the darkness of ignorance.

Gemini is the sign of learning and education. A new way of teaching inspires the younger generations. The goal will be to educate. The cost of education will decline opening an opportunity to all. The ways in which information is taught will be inspirational creating more motivation. New incentives activate students through competition similar to sports, making education a more interesting field.

Lines of communication will open and technology will improve. The mind is a valuable commodity and new technology that heals will be implemented. There are advances in the understanding of the mind and consciousness. This has a huge effect on the understanding of addictions and mental disease.

Since Gemini rules communications, the media will come under investigation while the public takes back their rights and stands up to media control.

The world of energy is taking a different approach. With all the rush to drill and find oil a new technology surfaces. Since there is a major emphasis on air signs there will be energy development more towards air, wind, gas, electric and currents as future trends.

New technology, higher education, and better communications will end old outgrown dictatorships. The way money is made and transmitted will end old tired financial markets. Through conflict, healing transpires from breakdowns to breakthroughs.

As always, the world affairs are a reflection of our own individual matters in our own lives. So this means the winds of change will affect how we interact in relationships. From a place of contention, fierce opposition, and lack of understanding comes breakthroughs or break-ups. There will be reconciliation that leads to compromise and understanding.

Making predictions for the world can be very unpredictable because some of the hardest aspects give the greatest results. I tend to be optimistic and have

to believe good will evolve out of difficulty. As I said, many astrologers are predicting doom and gloom with the worst economic crises yet to come. Western astrologers base this on the Uranus and Pluto square. Vedic astrologers look to Saturn and Rahu.

I believe the infrastructure to heal the extremes that have gotten out of balance with the global economy will be set into motion. The changes that are made during this time will make the world better and thriving years later.

As to the economy, there will be some grave hits due to the oil prices rising destroying many businesses. The price of military protection from possible war and attack is very costly. Debts will not be repaid and the stock market will take a toll because of all the surrounding circumstances. Natural disasters as in storms and earthquakes create insurmountable expenses that can never be recouped. Remember, people don't change unless they have to, and now is the year they will have to change.

## Vimshottari Dasha Cycles

The US Mars maha dasha began in September 2008, two weeks before the 2008 stock market crash that caused a drastic recession in the US. The Mars cycle lasts seven years, September 26, 2008–September 27, 2015. Mars is in the 7<sup>th</sup> house in Gemini which deposits back to the 8<sup>th</sup> house where Mercury is with Rahu. The 8<sup>th</sup> house is about large financial corporations, control and

monopolies. The US will be in this cycle till 2015, which means will be balancing the issues concerning finances involved with big business, the stock market and banks.

**Mars/Mercury: March 2012- March 2013:** The sub-cycle (Bhukti) is Mercury, which again concerns the banking industry, stock market and the corruption in the loss of billions of dollars. These issues will be addressed.

**Mars/Ketu: 03/25/2013-08/21/2013:** The next sub-cycle is Ketu, which is placed in the 2<sup>nd</sup> house, indicating severe financial loss and difficulty. Bhukti ruler Ketu is the indicator of loss plus it is eight signs from Mars the Maha Dasha ruler. This indicates death and endings, overturn of leaders, corruption and great loss financially.

### **What Happened Before in Mars/Ketu**

**Mars/Ketu, 03/25/1893 - 08/21/1893:**

The panic of 1893 there was the worst financial crisis to hit the US of that time. In total 15,000 companies failed, 500 banks failed and there was 18% unemployment.

**Ketu/Mars, 03/31-8/27 1968:**

During 1968 there were the assassinations of two powerful leaders in the US  
Martin Luther King JR, April 4, 1968  
Robert Kennedy, June 5, 1968

To research the history of when the same cycles occurred, and what happened as a result reveals the effects the dashas may bring in the future. This should be a wake up call!

### **Transits to USA Chart**

The transits for the US chart are full of events that will bring changes that are needed for a better future. There will be a healing on all levels.

The big picture is based on the slower moving planet's aspects, which influence long range and big effects. The "big effect" transit is Uranus square Pluto. Uranus at 15 degrees of Pisces is square Pluto at 15 degrees Sagittarius.

This aspect specifically hits Natal Jupiter 15 degrees Gemini this year. Transiting Pluto will oppose and Uranus square natal Jupiter. Natal Jupiter is one of the most important planets in this chart and has always been activated when huge events have occurred in the U.S. It was aspected in the attack on September 11, JFK and Lincoln's assassination and the 1906 earthquake in San Francisco. Jupiter is the ruler of the chart with Sagittarius ascendant and rules the 4<sup>th</sup> house of the homeland.

Pluto has been hovering on this ascendant degree over the past years creating instability and social unrest in America. Pluto produces transformation and change.

Transiting Neptune is conjunct the natal Moon. Neptune transits very slowly through the zodiac, transiting one sign in 14 years and all 12 signs in 164 years. This aspect has been in effect for over a year and a half and it is approaching an exact hit. Neptune rules deception and illusion. This conjunction indicates deception, denial and deceit concerning the financial markets in America. This country has experienced great loss and corruption on Wall Street and the banks. Trillions of dollars are lost and no one is accountable. Furthermore, this conjunction occurs in the 3<sup>rd</sup> house of war and attack, and the Moon rules the 8<sup>th</sup> house of control, huge money and monopolies. Neptune confuses and hides the truth.

The most overwhelming aspect of the year concerns the Rahu and Saturn conjunction transiting the 11<sup>th</sup> house. Both Rahu and Ketu cast trines as their full aspect. Rahu is aspecting all four natal planets in the 7<sup>th</sup> house and the Moon in the 3<sup>rd</sup> house. This will cause intense, fanatical, and irrational actions instigating emotional turmoil. The Moon in the 3<sup>rd</sup> house (communications) indicates deceptive practices of the media. Saturn fully aspects the 10<sup>th</sup> sign (square) from its position. Saturn will be aspecting Mercury and Rahu in the 8<sup>th</sup> house. Saturn's aspect to Rahu causes damage to the economy, dissolving the monopolies and banks that have been deflating the economy from massive greed and corruption.

Saturn transiting the midpoint of Rahu and Ketu will eventually bring balance to the financial predicament facing America. Saturn in this position is also aspecting the US ascendant by the 3<sup>rd</sup> full aspect. So this placement in the 11<sup>th</sup> house is critical aspecting specific points, plus Rahu aspects the major points

activating the chart in a powerful way. This puts Ketu in the 5<sup>th</sup> house aspecting the Ascendant. Note, Saturn will station at 17 degrees Libra, February 18, and the solar eclipse, November 3, will occur at 17 degrees of Libra. This critical degree is the midpoint or square of both Rahu and Ketu. All these aspects occurring simultaneously indicate a very poignant year for this chart.

The four planets in the 7<sup>th</sup> house in Gemini disposit to Mercury in the 8<sup>th</sup> house. The 8<sup>th</sup> house is about control and power, in which the US is a mastermind for the financial controls of the world. So when these planets are aspected in regard to the financial markets they affect the world. Mercury is retrograde with Rahu indicating this country has extreme highs and lows steeped in powerful controls and corruption.

Transiting Jupiter in the 6<sup>th</sup> house until June pertains to healing, health matters and work in this country. Last year, Ketu conjunct Jupiter denied the process of healing these matters, but in January these matters will begin to be corrected for Jupiter will transit solo without Ketu's negative influence. This indicates the new system of health care will be instigated in America.

In late spring, Jupiter begins to aspect natal Saturn in the 10<sup>th</sup> house, ruler of the 2<sup>nd</sup> house (finances), and hope for the economy. The plan put forth will create jobs and work in the U.S. This can indicate expansion in the financial flow.

The transit of Mars is crucial to understanding violent events in the US.

**03/24/2013: Transiting Mars aspect natal Jupiter** (4<sup>th</sup> full aspect, square)

**04/04/2013: Transiting Mars aspect natal Sun**

Aspects to the natal 7<sup>th</sup> house planets have produced violence in previous years.

### **Previous Transits to the US natal 7<sup>th</sup> House Planets (Jupiter and Sun)**

**04/14/1865 (Lincoln's Assassination):** Transiting Mars was conjunct natal Jupiter

**12/07/1941 (Pearl Harbor Attack):** Transiting Mars square natal Sun

**04/18/1906 (San Francisco Earthquake):** Transiting Uranus opposed transiting Neptune was conjunct natal Jupiter. Transiting Mercury (Pisces) forms a T-square with transiting Uranus (Sagittarius), and transiting Neptune (Gemini) all at 15 degrees aspecting natal Jupiter at 15 degrees Gemini. So transiting Neptune was exactly conjunct natal Jupiter. Neptune is actually the planet most associated with earthquakes.

\*Natal Jupiter is active in all these crises in US history.

Transiting Mars and Ketu join forces in April opposing Saturn and Rahu activating natal Mercury and Rahu in the 8<sup>th</sup> house. (Mars' 4<sup>th</sup> aspect) Mars becomes violent and intense in Aries and when the Sun transits into Aries **April 14-May14**; acts of terror will be triggered. Mercury rules the 10<sup>th</sup> house of government and heads of state. There are events threatening the safety of our nation and leaders.

The total solar eclipse May 09, 2013 is powerful! Mars will cross the eclipse degree (May 17) activating fighting and social unrest around the world. Attacks will center on the Middle East.

In June benefic Jupiter will go into the 7<sup>th</sup> house. Normally, I would predict expansion and growth, but the past history of the U.S. has proved otherwise. The last time Jupiter transited in Gemini with Rahu, tragedy struck in 2001. Jupiter takes 12 years to transit the zodiac. Jupiter's influence with Rahu causes it to expand in an extreme and exaggerated way. The core essence of these 7<sup>th</sup> house planets are deposited in the ruler of Gemini, Mercury in the 8<sup>th</sup> house. Transiting Rahu in Libra aspects Gemini by trine. Rahu carries the influence of Saturn since they are in the same sign. But Saturn holds great influence in Libra and the greatness of Saturn will prevail. Hard work, discipline, persistence and patience will turn coal into a diamond. This will transpire in the coming years.

President Barack Obama's natal Mercury and Sun conjoins Mercury and Rahu in the 8<sup>th</sup> house of USA birth chart. This connects him with the powers that control the USA economy and banks. The 8<sup>th</sup> house indicates power and control and sometimes relates to corruption.

### Vedic Yearly Chart

The Vedic Yearly Chart is the New Moon chart for when the Moon is new in Pisces. The planets on this day predict global events for the year. But how they will affect each country is determined by using the longitude and latitude for the place in question. The birth charts for each country allows us to see where the planetary forces will affect different areas in the world. The new Moon in April is the chart that will determine the outcome of the year for the world. I have used the longitudes and latitudes from different nations. For the US I use the coordinates of Washington, DC. The planetary aspects will be the same but the houses they influence give perspective on how these events affect different countries. The Pisces new Moon charts included are USA, India, England, Israel, Japan, China, and North Korea.

This is a very challenging year concerning the USA. It is very dysfunctional. All the planets except Neptune are involved in multiple yods. Yods are called the “Finger of God”. This means a fated part of destiny is about to fall on the planet.

This stellium of planets (Mercury, Uranus, Moon, Sun, Mars, and Venus) are in the 2<sup>nd</sup> house of money and Saturn is quincunx. Because Saturn is also quincunx Jupiter it sits in the most unfavorable placement from all these planets. And Rahu with Saturn makes it even more intense. Mars has a very powerful placement here, for it casts the most difficult 8<sup>th</sup> full aspect. This will increase violence and anger. Things are heating up and becoming explosive. The frustration is increasing. The financial markets and banks are exploding. Spending is limited and the world is at a standstill.

During this time Venus is instrumental because it is the depositor of Jupiter, Saturn and Rahu. Venus in this chart is 29 degrees Pisces, which is exalted but Ghandanta, the last degrees of a water sign. And in this case it is the last degree of Pisces, the last sign of the zodiac. Ghandanta indicates drowning which may indicate massive death through drowning. It may come as a result from earthquakes, or tsunamis. Furthermore, Venus and Jupiter are in mutual

exchange of signs (parivartoma). This connects Jupiter and Venus intrinsically, and they operate as one.

Since Jupiter is in the 4<sup>th</sup> house of the home and land, financial troubles come from damages to the land, from either earthquakes or attacks. These events occur suddenly and unexpectedly for Uranus and Saturn are in exact 6/8 relationship.

All the planets in Pisces are in square to the four planets in the US natal 7<sup>th</sup> house. These planets were aspected when any life changing events occurred in the US Uranus will be 15 degrees exactly square natal Jupiter of the US chart. Again Jupiter rules the 4<sup>th</sup> house of the homeland doubly indicating unexpected events like earthquakes or attacks.

The fighting and anger of the people on earth is causing destruction. This is a wake up call for unity and support, or otherwise there will be self-destruction.

This chart reveals the massive problems facing the US in the area of finances affecting the stock market, banks, businesses, jobs and living conditions. This hits the US where it really hurts, financial loss. Dramatic actions with drastic means will have to be taken.

Saturn and Rahu are in the 9<sup>th</sup> house indicating that truth will prevail and change the world.

**03/02/2010: Rahu/Rahu:** India just began the Rahu dasha, which shifts India's attention to the material world. There will be many technological discoveries and revolutions in India. The westernization of this culture is in full force. Let's just hope this doesn't taint the new generation from the spiritual gifts of India. And one of these gifts is Vedic astrology.

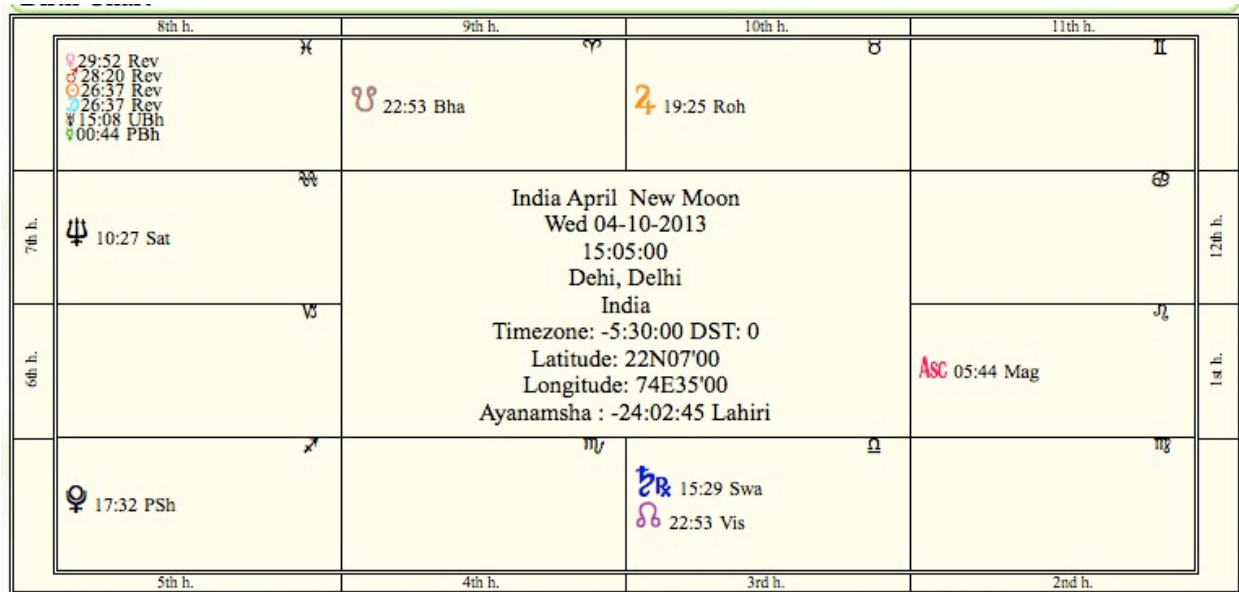

**11/12/2012: Rahu/Jupiter:** There will be many health difficulties for Jupiter is in the 6<sup>th</sup> house and 6<sup>th</sup> from Rahu. This can indicate famine and disease for Jupiter rules the 8<sup>th</sup> house. It could indicate a pandemic and problems with food and crops.

Transiting Saturn and Rahu will be on natal Jupiter the bhukti ruler further indicating health problems that can cause devastation and many deaths within this time frame.

Once India is past this time it will rise in great developments, upgrading its status worldwide.

04/08/2015, Rahu/Saturn: Travel, communications and education become strong. Education and schools rise to top levels empowering the new generations.

### India's Yearly Chart

India has a very difficult chart concerning this New Year for the stellium of planets goes to the 8<sup>th</sup> house of death and endings. There may be an event that takes the lives of many. The economy has a difficult struggle from corruption that controls the financial direction of the country. Saturn rules the 6<sup>th</sup> house of health and enemies and is conjunct Rahu indicating the possibility of a pandemic or health crises. The 3<sup>rd</sup> house can indicate attacks, so India is in a precarious situation with terrorist.

The best birth chart for the UK seems to be the Coronation chart for William 1<sup>st</sup> at Westminster Abby in London. Since this was so long ago I am reluctant to use the Ascendant and the dashas. But England seems to have a very difficult chart concerning enemies both secretive and open enemies with Saturn and Rahu in the 6<sup>th</sup> house (open) and Moon and Ketu in the 12<sup>th</sup> house (secret). This makes sense of the intense bombing attacks in World War II. Saturn with Rahu gives an intense and powerful drive to be in control. Exalted Mars (powerful degree of Exaltation) in the 10<sup>th</sup> house keeps England a world power, and Queen Elizabeth II has her natal Mars at this exact degree in her birth chart in her 2<sup>nd</sup> house.

The stellium of transiting planets in Pisces March - April will all converge into the 12<sup>th</sup> house over the Moon and Ketu indicating possible secret attacks in unexpected places. This occurred before when terrorists attacked the underground subways (July 7, 2005). Transiting Mars and Rahu were conjunct the natal Moon. The Moon rules the 4<sup>th</sup> house so it indicates secretive attacks on the homeland.

The stellium of planets in the 10<sup>th</sup> house brings England into the limelight. Because of loss and possible secret attacks England will make a major stance that puts them in control in many ways worldwide. Many decisions concerning the world will be in the hands of the United Kingdom. This concerns the global financial markets as well. Saturn and Rahu in the 5<sup>th</sup> house of advisors give leadership with a sense of reason and diplomacy to make major decisions concerning peace and prosperity in the world.

There is the threat of nuclear war surfacing as Saturn converges with Rahu in Libra. This initiation could involve the world.

Transiting Saturn conjunct natal ASC: Saturn causes set backs and problems. The Ascendant is the most sensitive degree of a chart causing personal harm and endings. Transiting Saturn is also aspecting natal Jupiter, ruler of the 3<sup>rd</sup> and 6<sup>th</sup> houses pertaining to war and enemies.

Transiting Saturn squaring natal Moon: The Moon is placed in the 10<sup>th</sup> house and is in Cancer so it rules the 10<sup>th</sup> house. This indicates the leaders and rulers

are under pressure and there may be endings that are volatile indicating despair and ruin. The 10<sup>th</sup> house represents the reputation and public image displayed to the world. Decisions made by those in office may be very unpopular. This intensifies this dangerous point causing officials in this country to make rash and harsh decisions that may cause many supporters to ban support leaving Israel feeling forsaken in their efforts to protect and find future peace and harmony.

Transiting Neptune opposed natal Mars: Hidden undercurrents of war have been brewing last year. Since Mars is in the 11<sup>th</sup> house of humanity and allies, they will discover their lack of support due to unreasonable demands. This could cost them dearly for no one will offer support or defense. Their ulterior motives are revealed and will put Israel in a bad light. International business will cease causing a financial bust.

As Saturn makes its station both times in 2013, it forms important aspects to natal degrees in this chart. Saturn will turn stationary retrograde February 20<sup>th</sup> at 17 degrees Libra. This forms a 6/8 relationship to natal Mercury in the 8<sup>th</sup> house. This will cause dissension and problems with communications and represents attacks from unsuspected enemies. The internet and social media is confused and interrupted. July 9<sup>th</sup> Saturn will turn stationary direct at 10 degrees Libra which activates the sensitive degree of the natal Moon in the 10<sup>th</sup> house once again, which means war continues with lack of support and devastation financially alienating allies. The eclipse degree November 3, 2013 is 17 degrees of Libra further adding to the intensity of their natal Mercury in the 8<sup>th</sup> house.

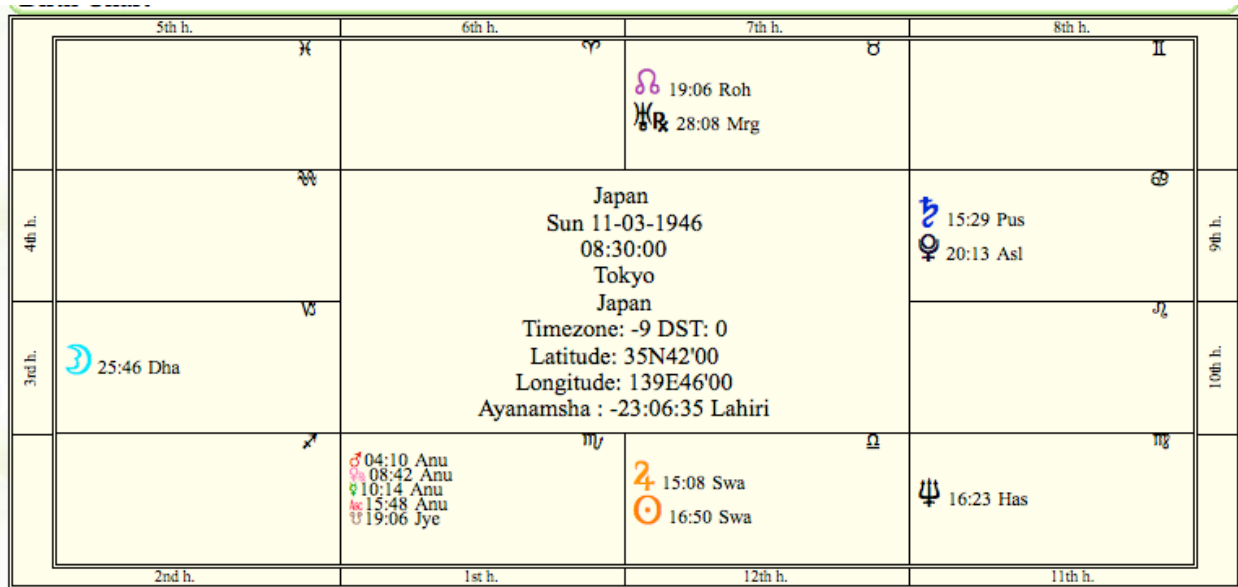

**November 8, 2012–June 9, 2013: Moon/Ketu:** This indicates great loss of power and a fall from grace. As Ketu is the karaka of loss and both natal Moon and Ketu are being adversely aspected. Transiting Saturn is aspecting the natal Moon, and transiting Saturn and Rahu will conjunct natal Ketu. The fact that natal Ketu is 4<sup>th</sup> from the Moon means loss of security possibly attacks, and the Moon in the 10<sup>th</sup> house ruler of the 10<sup>th</sup> house represents loss of respect and endings for their leaders

Saturn and Rahu are in the 4<sup>th</sup> house of homeland, which can cause problems in the way of security and protection. This can indicate attack such as nuclear war. Rahu rules extremes and nuclear energy. With Ketu in the 10<sup>th</sup> house there will be changes within the government and leaders. Israel must reinforce protection during this difficult year. With negotiation and support of other countries they must compromise. The stellium of planets in the 9<sup>th</sup> house can bring peace through truth and justice.

## Japan's Birth Chart

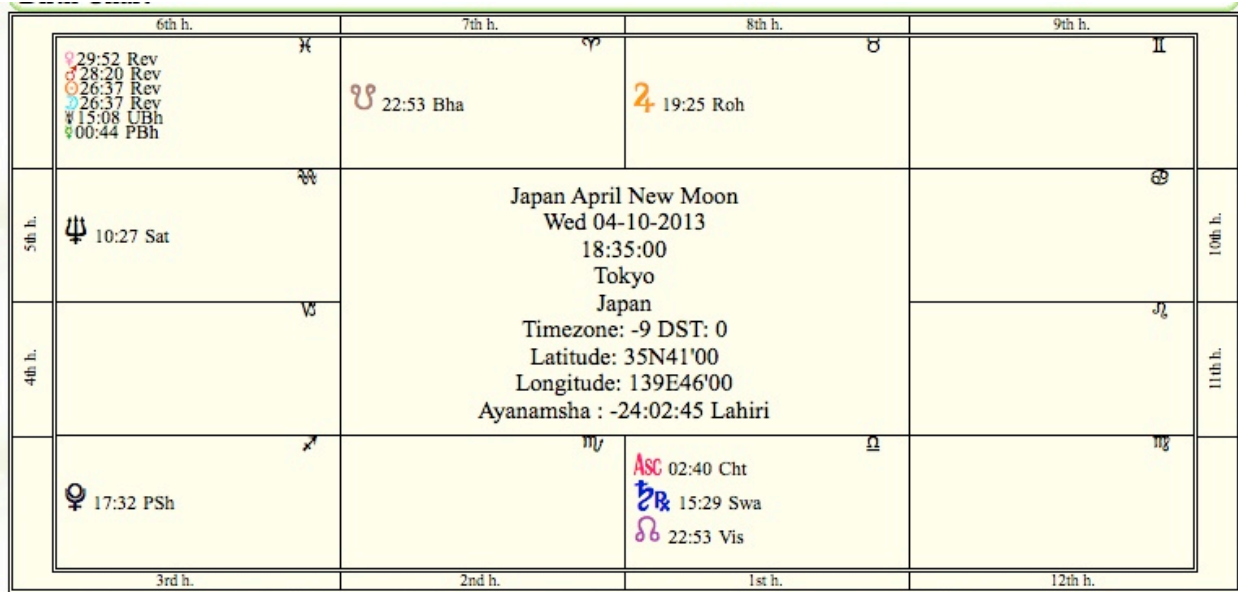

I am very familiar with this chart for I have had made predictions for my Japanese website over the last five years. In March 11, 2011 I predicted the 9.0 earthquake months prior, due to transiting Mars at the exact midpoint of Rahu and Ketu, and transiting Rahu and Ketu aspecting natal Mars. This gives validation to this birth chart.

Rahu and Saturn will be transiting Japan's Sun and Jupiter in the 12<sup>th</sup> house indicating a very difficult time for recovery from the recent losses. The depressed economy takes a fall as the world is in crisis.

The Sun rules the 10<sup>th</sup> house indicating their leaders and government need to change. Japan is in desperate need of strong leadership. Those elected to power have a very difficult road ahead. The new leader is unpopular and may be eliminated.

## Japan's Yearly Chart

Japan is trying to keep afloat for the stellium of planets are in the 6<sup>th</sup> house of struggles, but with work they will over come this crises. Threat of attack from neighboring countries causes alarm. Infectious disease seems to be overwhelming due to the extreme cold weather.

On the positive side new discoveries in medicine bring cures and prevention. Old monopolies that control the markets are forced to disperse, opening new opportunities for small businesses.

The Japanese are very resilient and will invent new discoveries and technology, specifically in the areas of health and healing.

China has a strong but complicated chart for wealth and money. Venus in Libra in the 10<sup>th</sup> house gives prosperity and growth through creative and innovative business. They are shrewd with industry, trade and products. Saturn and Rahu transits their 10<sup>th</sup> house this year indicating a strong financial hold on other countries. The stellium of planets March- April in the 3<sup>rd</sup> house indicates growth through commerce, sales and trade. The solar eclipse in May indicates earth quakes, as it occurs in the 4<sup>th</sup> house of the homeland.

China's chart is strong for it has the stellium in an angular house (7<sup>th</sup> house). The 7<sup>th</sup> house gives power to manipulate others to do their work. Saturn/Rahu in the 2<sup>nd</sup> house indicates a problem with the financial markets, but once Jupiter goes into Gemini in June they will be very productive and in control again.

## North Korea's Birth Chart

The birth chart for North Korea indicates volatility and violence. The fact that they have nuclear bombs is a concern. They have Mars and Ketu in the 12<sup>th</sup> house and transiting Saturn and Rahu will be conjunct their natal Mars and Ketu. They should be guarded and watched for they are extremely dangerous.

## North Korea's Yearly Chart

North Korea's Yearly chart has the same ascendant as China. They are in a powerful position. But with the stellium of planets in the 7<sup>th</sup> house they will retaliate against any opponent and are prepared for war. With Saturn and Rahu in the 2<sup>nd</sup> house they and China have financial power to control their country.

This month is the American Presidential inauguration on January 20. January 13-15 both Mercury and the Sun will enter Capricorn and Mars is in Capricorn till January 26. Capricorn as the cardinal sign of government indicates change, so this is an appropriate time for the Inauguration. It is a powerful time of new beginnings.

**January 15-26:** The Sun, Mercury and Mars will be in the same sign, Capricorn. Mars is exalted in Capricorn giving it full force and power. This is a time of reorganization with a serious tone for restructuring the economy, for these planets are transiting the 2<sup>nd</sup> house of money in the US chart. This is a time of finishing out the old and commencement of the new as the nodes of the Moon Rahu/Ketu are changing signs from 0 degrees of Scorpio/Taurus to 29 degrees of Libra/Aries (they travel backwards).

**January 30:** Jupiter will turn direct and will be free to act without delay and drain of Ketu after January 24, which will lighten up the areas of financial ruin within the banks and government. The areas Jupiter is transiting in your personal charts will begin to offer freer energy, manifesting what has been delayed. Within the chart for the US, it releases the delay in health care and work issues in the US, as it will transit the 6<sup>th</sup> house of health and work through May.

Rahu is approaching Saturn, a new form of government will be appointed to create the foundation for growth and prosperity. It will take time to create a solid ground to build. Mercury is traveling at top speed so it gives clear judgment and new ideas.

Mars will square Saturn the first week causing contention and frustration over many transitions being implemented for the coming year. The leaders have switched gears and progress and change is occurring too quickly. Saturn rules government and the constraints and limitations are tested and stretched to the max. Contention and arguments break out and cause a further breakdown.

This will be a year of extremes with weather. Expect a very cold winter. The weather patterns and storms will break records.

The faster moving planets (Sun, Mercury, Mars, Venus) are coming together where they will be traveling in unison creating havoc in the signs they converge month after month for the next four months.

**February 4:** Mars will conjunct Neptune in Aquarius. This will intensify and activate Neptune, meaning hidden agendas will surface and cause anger and fear. Corruption and financial fraud will be uncovered in the financial markets. There is a major glitch in the production and distribution of oil around the world causing gas prices to suddenly rise.

Financially there is a lock on the ability for these companies to reap the benefits of financial gain. The oil companies are in trouble. The government begins excessive taxation, which ultimately affects the middle class. This glitch will have major repercussions globally causing financial losses. Forces behind this problem will keep their secrets of manipulation under cover. The media will instill fear but with many false accusations focusing the attention away from the truth.

**02/18: Saturn turns retrograde**

**02/23: Mercury turns retrograde**

This causes a stalemate between the government and the people. More constraints are put on the oil companies damaging the economy. It will limit growth in the United States because of dependency on foreign oil, which may be withheld. There is a political war emerging, and the end result could be devastating. This war is actually within our government, but will be blamed on foreigners. The controls that rule the world will not go easy on the power hungry political forces in play, and there may be a radical event to eliminate their further actions.

Internal anger will externalize in sudden outbursts and attacks. The planets will gather and converge over Neptune, the damage made from revealing information infuriates the masses. There is a mass social uprising activated through the media. But the public doesn't realize the controlling forces are

manipulating them, and misdirects their anger. Nonetheless, the masses are fighting and the truth is protected.

**March 17:** Mercury will turn direct in Aquarius conjunct Neptune. Minds open to the deep corruption occurring deep within the government and world economy. The forces of dark and light continue to butt heads. The social strife and contention is heating up to a crescendo.

As Rahu in Libra aspects the planets in Aquarius (Sun, Mercury, Venus, Neptune) stress and frustration magnifies within the economy. The extremes are quickly doubling in force and power.

**March 27:** The full Moon sheds light on the truth and gives rise to more anger and frustration, for greed, control and power rule the world from a very secretive place. The forces of power no longer rule outwardly as dictators like Stalin and Hitler, but now secretly behind the scenes with their luring deception of powerful money. There will be assumed suicides in relation to blame in the corruption and loss in Wall Street and the banks.

By the end of the month Mars will conjoin Uranus causing upsetting sudden events that stress the global economy. The Euro cannot endure the tension. Europe is thrown in a downturn of economic crises. There will be sudden earthquakes and natural disasters globally.

**April 12-17:** This is the beginning of extreme events that will mark this time in history. As Mars and the Sun converge in Aries the god of war rears its ugly head. The incongruent energy of the double yods makes for a complicated chart. 1) Yod: Saturn/Rahu sextile Pluto quincunx Jupiter, 2) Yod: Jupiter sextile Mercury, Uranus, Sun, Moon, Mars, Venus all quincunx Saturn/Rahu. And the trigger point of this Yod is Ketu. This will be a treacherous and

difficult time globally. Yods involve 6/8 relationships of planets. The place we evolve to will eventually bring peace and harmony. A cleansing is essential to clear the building financial and emotional debts.

**April 30:** Mars will oppose Saturn causing possible attacks and unexpected warfare.

**May 09:** Total solar eclipse in Aries, conjunct Ketu indicates a time of loss and endings. Mars tightly conjunct Ketu will cross over the eclipse degree May 17 indicating a violent event. These planets are tight and concentrated marking a specific event of a violent nature.

Countries and individuals with planets in Aries and Libra will have a challenging time. Events will strike quick and the fallout will be great, but powerful transformations for a new world develop out of this chaos. The realization of good advances may not be understood until years later.

**May 20:** Uranus and Pluto come into their exact square at 17 degrees, which mark a critical degree pertaining to earthquakes and volcanic eruptions.

Jupiter transits into the sign Gemini. The focus is on communications, education, media, commerce and travel. This month brings peace, as all three benefics will be traveling together in Gemini. Rahu and Jupiter both cast trines so they are mutually aspecting each other. This will bring windfalls for some

and breakdowns for others. Rahu and Saturn can use the benefic energy of Jupiter's aspect. This may indicate healing and friendship from the previous harsh aspects. The air signs rule understanding and consciousness. A grand air trine is forming with Jupiter in Gemini, Rahu/Saturn in Libra, and Neptune in Aquarius.

The nakshatras that are activated during this time are ruled by Rahu, therefore empowering the sign Libra, where Rahu resides. This is a powerful time for healing through words, speech and music. There is a great opportunity to bring peace and unity to a split and polarized world.

The three benefics together form a Saraswati Yoga (goddess of learning, arts, and music) indicating developments in education towards the arts, music, dance and movies. People will merge in appreciation and understanding with a commonality of humanity. This also indicates advancement towards education and learning. Education is honored, esteemed and cherished restoring new schools of the arts. Creativity is opening the channels that cultivate free thinkers and open-minded trendsetters.

**June 26:** Mercury turns retrograde, empowering Mercury in Gemini. Mercury is the dispositor of all the planets while in Gemini. Improvements concerning travel will be made out of necessity. This may come as a problem that has been exposed within the travel industry. This Mercury retrograde is intense, so take caution around travel. Inventions involving travel and space bring new discoveries concerning time and space. Time travel may no longer be a mystery. This can transcend what we know scientifically. We are on the brink of new perceptions of time and reality. Quantum physics takes us beyond the 3<sup>rd</sup> and 4<sup>th</sup> dimension.

**June 7:** Mars in Taurus will square Neptune, and quincunx Uranus causing problems within the banks. Taurus rules banks and money. The processing of money and the ways it is distributed changes in many ways.

**June 14:** The Sun enters Gemini with Jupiter. Planets too close to the overpowering Sun are combust weakening their energy. Jupiter is squaring Uranus and opposing Pluto, forming a T-square. There are upsets and problems around travel. There is an initiation of different uses of fuel, such as electricity, wind and natural gas ruled by air signs. The oil tycoons will be

arranging things in their favor, maybe better developing natural gas, since they own these companies as well.

Solar flares can cause havoc on the natural forces globally. This will cause a wave a natural disasters, earthquakes, tsunamis, and shifts in the gravitational pull of the earth.

Another shift is due this month as Mars, Sun, Jupiter and Mercury converge into Gemini. The Sun is unstable during this time causing unusual heat waves and solar flares.

**July 22:** Mars conjunct Jupiter intensifies Jupiter's energy to increase world trade. But caution must be taken until Mars and the Sun leave this sign.

**July 4:** Independence Day for America is dangerous, for Mars will enter Gemini and conjunct the US Mars in the natal chart. Additionally, on this day the Sun will square Uranus on specific degrees so sensitive to the US: 15 and 22 degrees Gemini. Study of past dangerous events have involved these degrees in the US chart, natal Jupiter 15 degrees Gemini rules Sagittarius, ruler of the Ascendant, and the Sun 22 degrees Gemini. The sign Gemini is magnified by transiting Rahu casting a trine to transiting Mars. This could involve terrorism with airplanes, missiles or explosives through the air.

**July 7:** Saturn will turn stationary direct initiating forward movement in business affairs around the world.

**July 27-31:** The weather heats up around the world and causes earth changes; Mars square Uranus opposed Pluto, and the Sun is square Saturn. There will be record high temperatures globally. This will ruin crops and strain farming and food production around the world. It can indicate global famine. India is prone to heat and destruction of crops causing famine and disease. There is a break down in communications and democracy.

August is hot and angry!

**August 6:** Transiting Jupiter and Mars are in a very precarious position for the USA natal chart. Transiting Jupiter is 15 degrees Gemini same position as natal Jupiter and transiting Mars is 22 degrees Gemini, same degree as the USA's

natal Sun. Additionally, transiting Pluto is opposed natal and transiting Jupiter. This involves uncanny multiple transits hitting simultaneously. This may indicate attacks on the American government or our land. Protection is important and very costly. The economy is taking a toll from the expense to defend and protect our nation.

Unexpected upsets on our land and country can also indicate explosive earthquakes and eruptions.

**August 18:** Mars will enter Cancer where it is weak in the 8<sup>th</sup> house of finances and banks. This causes financial upsets around the world. Financial problems become the focus.

**August 21:** Jupiter square Uranus activates sudden upsets and sizable activity around severe weather and storms. Hurricanes and tornadoes will be extreme this year.

**September 9:** Mars square Saturn causes economic problems to dominate and with fear in the financial markets causing an economic crises. Many are clinging to their savings. There will be a temporary decline in the housing markets with Mars debilitated for it rules real estate and Saturn rules land. There is a block or delay within land exploration and drilling and the ability to receive oil and fuel. This is probably due to problems with the Middle East and financial stalemate.

**September 17:** Saturn and Rahu are exactly conjunct. This flavors the entire year with intensity around world strife in the economy, war, and severe weather to bring balance for future progress.

**September 20:** Pluto turns direct, affects the mass emotional level of the people. The war moguls of the world begin to release power and surrender. A critical and difficult matter concerns beliefs and religions with the opposition of Jupiter and Pluto. Wars are still being fought on the issues of religion. Religious fundamentalism dominates the world as these planets oppose at the mid-point of signs Sagittarius and Gemini. But the fundamental roots of religious matters are rooted in greed and materialism.

October, the world is at a point of surrender and progress is made towards an opportunity to make peace after much turmoil. But hate is still fueling many.

As the planets close in for another round of eclipses the direction has changed. New ideas become possible due to a different way of viewing the world.

Jupiter becomes more comfortable in the sign Gemini without the antagonism from other planets crowding his space. Finally, the lines of communication open between countries promoting work together for the betterment of mankind, particularly for economic reasons.

**October 5:** Mars will enter Leo gaining in strength to produce forward movement. But don't expect fuel prices to go down, for they will spike upward as Mars opposes Neptune.

**October 19:** This will give a boost to the productivity in the economy dependent on spending and financial flow. As the new Moon opposes Uranus new ideas forge forward.

**October 21:** Mercury turns retrograde and closely conjuncts Saturn. This brings a serious minded attitude to the world with a desire for peace in the sign of Libra. Mercury retrograde brings up new issues to find solutions to problems around the government. Many laws will have to be rewritten to avoid the problems experienced in the recent past. Businessmen from around the world will be called upon to unite minds and forces.

Mercury is retrograde with Saturn, Sun and Rahu, which is not an easy transit for Mercury. All three planets cause separation by force and energy. So communications are unconnected and there are no agreements. This can bring misunderstandings and disconnection of minds.

Mental problems and addictions consume many due to alienation and lack of communication. But this obsessive quality can generate interest in unusual subjects such a metaphysics and astrology. People are searching for answers.

**November 1:** Uranus and Pluto square off again causing sudden upsets in the world, especially in the US for this is again activating the specific sensitive degree of natal Jupiter in the US chart. The changes incurred during this time have transformed the world into a different place.

**November 3:** Total solar eclipse conjunct Rahu and Saturn indicate an extremely intense time. Mercury is brutally confined with the bad company of Rahu and Saturn. Lack of understanding and communication complicate world issues. The sign Libra is the focal point for this intense transformational energy. This can be both empowering and destructive. There will be sudden life changing windfalls for those with planets in Libra. Venus is crucial as the ruler of Libra, as it travels in Sagittarius in opposition to Jupiter. But considering Saturn and Rahu as malefic, apparent windfalls are actually from hard work and determination.

**November 10:** As Mercury turns direct at 8 degrees Libra new ideas flood the consciousness of many for Jupiter is stationing to add force to the air signs of communications.

**November 13:** Neptune turns stationary direct at 8 degrees Aquarius casting a perfect trine to Mercury as both stand still (stationary) in the sky. This indicates the winds of change are opening doors of many repressed secrets and truths that will free the world of much suffering. This gives freedom after much discord. Information and knowledge heals past ignorance.

**November 17:** The full Moon at one degree Taurus is ominous for this is the degree of the most dangerous and destructive fixed star, Algol. Those who have lied and been deceitful will come clean and bare their souls. This may end many relationships but produces healing, for the truth heals.

**November 28:** Jupiter will trine Mercury and oppose Venus casting its open rays to the benefic planets it conjoined last June. This is a turning point and release of previous hardship. The light is shining at the end of this tunnel.

- 12/31 Venus conjunct Pluto, Mercury square Mars

The many transitions that occurred last month during the eclipse period are transforming the world to another level. The spiritual opportunities have inspired a new level of consciousness. But more turmoil is on the way as Uranus and Pluto form a square again. The economy is in a better place than last year due to spending. The flow seems encouraging and puts the minds of fear to rest, but the debts remain. We are past the Saturn and Jupiter waning

quincunx. Jupiter and Saturn are in trine and will continue to move into a much better line up in future years. We have reached the halfway mark in this economic revolution.

**December 12:** Jupiter and Saturn trine, which give a better outlook for the economy. As Jupiter comes into Cancer, its sign of exaltation in 2014, and Saturn is still in Libra, there will be signs of relief.

**December 14:** Uranus stations at 14 degrees and will move towards a final squaring off with Pluto bringing the process of transformation and change. This is necessary to heal the world of the crisis of religious freedom and a better understanding of our differences and the lesson of tolerance.

Anger and hostility brought the world to its knees and the fight to be right almost destroyed the world. The lessons and growth that have transpired this year makes the world a better place. These are epic times in history. The greatest lesson we know and have come to understand as the world turns is the importance for unity and support in times of crises and need. Always knowing, "united we stand, divided we fall." This is the message for humanity.
